Skills

- ReactJS
- NextJS
- Django
- git
- Linux Administration
- JavaScript / TypeScript
- Bash / Shell scripting
- Flutter
- Docker
- NGINX
- jenkins
- Ansible
- PostgreSQL
- MongoDB

Certifications

DevNet Associate
Cisco

Languages

- French
- English
- Arabic

Experienced **Full-Stack Developer** with a passion for coding. Skilled in building **scalable** web, mobile, desktop, and IoT applications using modern frameworks like **NextJS**, **Django** and **Flutter** Proficient in **DevOps** practices including Docker, Nginx, CI/CD, and cloud-based deployment on **AWS**.

Experience

VERSE The Dot , Lac 2
Full-stack Developer April 2025-September 2025
overseeing **scalable** real-time platforms across web and mobile. I define **system architecture**, manage **DevOps**, and lead frontend, backend, and Flutter teams to ensure quality and delivery. I also implement secure **APIs** and **microservices** for platform growth.

SASCODE Lac 1
Full-Stack developer 2024-2025
I developed and maintained a **production-grade POS system** for retail and hospitality, integrating inventory, billing, and reporting modules. I also **migrated legacy code** from Next.js 13 to 14, built an **OTP web service**, and created a **price and budget prediction** tool to improve financial forecasting.

african-Biotech Saint Clément , Le Bardo
Software Developer 2024-2025
I led the development of the **Cirqua Waterwise** project’s real-time HMI solution, an EU-funded research initiative focused on sustainable water management and wastewater reuse using advanced monitoring, IoT, and treatment technologies. I integrated onboard and mobile systems for equipment control, built cross-platform interfaces with Flutter, developed gRPC services, and implemented offline-first functionality with seamless data synchronization.

Freelance Remote
Full-stack developer 2021-present
As a freelance full-stack developer, I create custom **web**, **mobile**, and **IoT** applications using React, Next.js, Flutter, and Django. I specialize in backend **APIs**, **real-time systems**, and responsive frontends, deploying with Docker, CI/CD, and cloud services. I’ve delivered projects for industries like e-commerce, IoT, and **SaaS**.

Education

Esprit Ingeniering
Computer science 2023-present

Lycee el wafa Bacalaureat
computer science 2019-2022
