Tunis, Tunisia

PROFILE

3rd-year computer engineering student at ESPRIT with hands-on experience in network architecture, routing protocol implementation, and infrastructure deployment. Built and validated a multi-service enterprise topology in GNS3 with OSPF, VPN, and full server stack. Completed a CCNA-level networking internship; currently preparing for Cisco CCNA 200-301 certification. Seeking a summer 2026 internship in network engineering or IT infrastructure.

TECHNICAL SKILLS

Networking: TCP/IP · VLANs · OSPF · RIP · VLSM · NAT · VPN · ACLs · DHCP / DNS · SSH · Inter-VLAN Routing

Tools: GNS3 · Cisco Packet Tracer · Wireshark · Linux · Apache · MySQL · Prometheus · Grafana · NFS

Programming: C / C++ · Java (JavaFX) · PHP / Symfony · SQL

EXPERIENCE

Networking & IT Security Intern Jul – Aug 2024
3S – Standard Sharing Software · Tunis, Tunisia

- Designed and documented IP addressing schemes using VLSM subnetting across multiple network segments
- Configured VLANs, trunk links, and inter-VLAN routing; deployed DHCP and DNS services across simulated topologies
- Implemented OSPF and RIP dynamic routing protocols; applied static routing for controlled path management
- Secured network access with ACLs and SSH hardening; isolated faults using ping and traceroute diagnostics

PROJECTS

Enterprise Network Simulation KEY PROJECT

GNS3 · OSPF · NAT · VPN · Prometheus / Grafana · Apache · MySQL · NFS

- Designed a full multi-department enterprise topology with OSPF routing, NAT, VPN tunnels, and VLSM addressing
- Deployed a complete service stack: Apache web server, MySQL database, Prometheus/Grafana monitoring, and NFS file sharing
- Simulated WAN-like inter-network communication via UDP tunneling across segmented departments

Full-Stack Integrated System
JavaFX · Symfony · MySQL · Google OAuth · Face Recognition API

- Built a desktop/web application with a shared database; led integration between JavaFX client and Symfony REST API
- Implemented multi-factor authentication: email OTP, Google OAuth, and face recognition

Embedded System Control Interface
Qt · C++ · Arduino

- Developed a Qt desktop interface for real-time serial communication with Arduino hardware

2D Game — SDL
C · SDL 1.2

- Built a complete 2D game in C with custom event loop, collision detection, and game logic

EDUCATION

ESPRIT — École Supérieure Privée d'Ingénierie et de Technologie Sep 2022 – Jun 2028
Cycle Ingénieur — Computer Engineering, 3rd year · Ariana, Tunisia
Key coursework: Computer Networks · Operating Systems · Database Systems · OOP · Software Engineering

CERTIFICATIONS & LANGUAGES

Cisco CCNA 200-301 IN PROGRESS Arabic (Native) · English (Fluent) · French (Professional)
